

L-PRO 2100 Transmission Line Protection Relay

Firmware v5.0a

Release Description

DESCRIPTION

L-PRO 2100 firmware release to address some minor issues.

FEATURE ENHANCEMENTS

- None.

CORRECTIONS TO ISSUES

- **Minor** – Corrected issue where the log from a previous session is displayed if the previous session was aborted without closing the log. Only the log can be viewed in the current session and the user must login before getting access to the unit.
- **Minor** – Corrected issue where the firmware update could not be cancelled without rebooting the unit.

COMPATIBILITY:

Compatible L-PRO 4000 Offliner Settings Software:	v2.0 or above
Compatible RecordBase View Software:	v2.3 or above

Minor releases, designated with a revision (e.g. v3.4 Rev 1), maintain the same compatibility as their base version (e.g. v3.4 Rev 0).

CLASSIFICATION OF CHANGES MADE

The issues fixed in software / firmware upgrades are classified as defined below. While the decision to upgrade installed products is the user's, these classifications provide a guideline for the need and priority of the upgrade.

Critical: Critical changes fix issues/problems that prevent the basic operation of the device and have no workaround. Critical changes merit a product upgrade as soon as possible, if that function is being used under the conditions causing the issue

Major: Major changes fix problems that prevent the basic operation of the device but do have a workaround. Any major changes merit a product upgrade as soon as possible if the function is being used under the conditions causing the issue and a workaround is not acceptable.

Minor: Minor changes fix non vital issues that do not prevent the basic operation of the device and may or may not have a workaround. Product upgrades for such changes are not necessary unless they apply to and are needed by the user.

Feature Enhancement: Feature enhancements add a capability or extend existing capabilities of the product. Upgrades for such changes need be made only if and when that feature enhancement is desired.
